ĐỀ THI CHÍNH THỨC VÀ BÀI LÀM
(Đề thi có 16 trang, gồm 68 câu và 1 bài viết luận)

- Thí sinh phải ghi đầy đủ các mục ở trên theo hướng dẫn của cán bộ coi thi và không được ký tên hay dùng bất cứ ký hiệu gì để đánh dấu bài thi. - Thí sinh làm bài trực tiếp lên đề thi (tại Câu trả lời của Bạn - Your answers) và nộp bài làm là đề thi khi hết giờ làm bài. - Thí sinh không được sử dụng tài liệu, kể cả từ điển. Không dùng bút chì để làm bài.
HƯỚNG DẪN PHẦN THI NGHE HIỂU: - Thí sinh nghe 02 đoạn, mỗi đoạn 02 lần, ghi âm mỗi lần cách nhau 05 giây. - CD đã được ghi đủ số lần, cán bộ coi thi mở cho máy chạy từ đầu tới cuối, 20 phút, không cần trả băng. - Giữa các đoạn có khoảng im lặng để thí sinh làm bài.

LISTENING COMPREHENSION - QUESTIONS 1 – 16: (4pts)

(Instructions: Listen to the recording and answer the questions. You will hear each part of the recording TWICE)

Now turn to Section 1

SECTION 1: Choose the correct letter A, B or C for **Questions from 1 to 8**

Question 1: Why did the lecturer choose to focus on the Pleasanton Town Market?

- A. It was the first ever Town Market.
- B. It has been covered extensively in local history classes.
- C. It is often mentioned in some literature of the library.

Question 2: The Town Market originally made a large profit selling _____.

- A. handcrafts
- B. animals
- C. vegetables

Question 3: The money that the marketers made contributes to local _____.

- A. development
- B. reconstruction
- C. defense

Question 4: Market sales plummeted due to a lack of viable _____.

- A. agriculture
- B. transport
- C. city planning

Question 5: Mayor John C. Wiley decided the Clock tower would be used as a _____ in the early stages of the uprising.

- A. clock
- B. grounds for battle
- C. jail

Questions 6-8: Choose the best option for the information of the project

Question 6: Which thing is NOT MENTIONED as the objects?

- A. Market
- B. Price
- C. Jim Wiley

Question 7: Which thing is NOT MENTIONED as research methods?

- A. Interviews
- B. Photographs
- C. Postage stamps

Question 8: Which thing is **NOT MENTIONED** as the problems?

A. There is a lack of experts. **B.** There is too much information. **C.** Bias makes it useless.

Your answers

Question 1: 	Question 2: 	Question 3: 	Question 4:
Question 5: 	Question 6: 	Question 7: 	Question 8:

SECTION 2: Questions from 9 to 16

Complete the notes below. Write NO MORE THAN ONE WORD for each number

Penguins in Africa

Appearance and lifestyle:
• They are also called Jackass Penguins for the sound they make. • The (Question 9:) _____ of their body remains constant. • They restrict their (Question 10:) _____ on land from dusk till dawn. • They cannot fly because they have heavy (Question 11:) _____. • They nest under (Question 12:) _____. They eat tree roots.
Predators:
- seals - (Question 13:) _____ - seagulls (eat the penguin chicks)
Threats:
• They lose (Question 14:) _____ in winter. • They are fighting for nesting (Question 15:) _____ and food because of human activities. • In order to improve survivorship, it is helpful to increase the (Question 16:) _____ of their genes.

Your answers:

Question 9: 	Question 10: 	Question 11: 	Question 12:
---------------------------------	----------------------------------	----------------------------------	----------------------------------

Question 13:	Question 14:	Question 15:	Question 16:

QUESTIONS 17-19: *Mark the letter A, B, C, or D on your answer sheet to indicate the word that differs from the other three in the position of primary stress in each of the following questions. (0.75 pt).*

Question 17: A. democracy B. panorama C. phenomenon D. photography

Question 18: A. conquer B. peter C. infer D. utter

Question 19: A. agenda B. architect C. industry D. protocol

Your answers:

Question 17:	Question 18:	Question 19:
---------------------------	---------------------------	---------------------------

QUESTIONS 20-22: *Mark the letter A, B, C, or D on your answer sheet to indicate the word whose underlined part differs from the other three in pronunciation in each of the following questions. (0.75 pt)*

Question 20: A. quay B. slay C. X-ray D. sway

Question 21: A. gem B. gin C. Egypt D. target

Question 22: A. clone B. done C. prone D. zone

Your answers:

Question 39:	Question 40:

PASSAGE 1:

QUESTIONS 41-50: *Read the passage and choose the correct answer to each of the questions below (2.5 pts).*

El Nino and Seabirds

A. Rhythm of the seasons cannot always be relied upon. At times the tropical Pacific Ocean and large expanses of the global atmosphere seem to be marching to the beat of a different drummer, disrupting the normal patterns of countless species of plants and animals along with hundreds of millions of human beings. So they want to anticipate these occasional lapses in the march of the seasons and help societies plan accordingly, scientists are seeking to understand these competing rhythms: the strongest of which is the alternation between the “normal climate” and a different but still recurrent set of climatic conditions in the Pacific region called ***El Nino***.

B. Seabirds are prominent and highly visible components of marine ecosystems that will be affected by global climate change. The Bering Sea region is particularly important to seabirds; populations there are larger and more diverse than in any similar region in North America - over 90% of seabirds breeding in the continental United States are found in this region. Seabirds, so named because they spend at least 80% of their lives at sea, are dependent upon marine resources for food. As prey availability changes in response to climatically driven factors such as surface sea temperature and extent of sea ice, so will populations of seabirds be affected.

C. Seabirds are valued as indicators of healthy marine ecosystems and provide a “vicarious use value” or existence value - people appreciate and value seabirds simply because they are there and enjoy them through venues such as pictures, nature programs, and written accounts without ever directly observing seabirds in their native environment. A direct measure of this value is demonstrated by Federal legislation that established specific national wildlife refuges to protect seabirds and international treaty obligations that provide additional protection for seabirds. Seabirds are also an important subsistence resource for many who live within the Bering Sea Region. Furthermore, the rich knowledge base about seabirds makes them a valuable resource as indicator species for measurement of change in the marine environment.

D. The most abundant breeding species in Alaska are northern fulmars, storm-petrels, kittiwakes, murres, auklets and puffins. These species also form the largest colonies. Fulmars, storm-petrels and kittiwakes are surface feeders, picking their prey from the surface or just below the surface; murres, auklets, and puffins dive for their food. Fulmars nest primarily on island groups in and around the Bering Sea. They take a wide variety of prey (e.g., fish, squid, zooplankton, jellyfish) from the surface or just below the surface. Storm-petrels are strictly nocturnal and nest below ground in either burrows or crevices between rocks. They forage on zooplankton and squid; in some areas they are dependent upon small fish such as capelin and sand lance caught at the surface. Black-legged kittiwakes are widespread throughout Alaska, Canada and Eurasia while red-legged kittiwakes are found only in the Bering Sea region. Both

are surface feeders although black-legged kittiwakes feed primarily on small fish and forage over the continental shelf and shelf break; red-legged kittiwakes feed primarily on myctophids and will forage beyond the shelf break.

E. Marine mammals have exhibited similar signs of food stress in recent years. Harbor seals at Tugidak Island in the Gulf of Alaska declined by about 85% between 1976 and 1988. Steller sea lion populations declined by 36% in the Gulf of Alaska between 1977 and 1985, and by another 59% between 1985 and 1988. Northern fur seals declined about 35% by 1986 from their average numbers in the 1970s, although numbers had rebounded somewhat (20%) by 1990. Associated with the declines in Steller sea lions are declines in birth rate, fewer breeding females, fewer pups, decreased adult body condition, decreased juvenile survival, and a change in population age structure.

F. Walker noticed that monsoon seasons with low-index conditions are often marked by drought in Australia, Indonesia, India, and parts of Africa. He also claimed that low-index winters tend to be unusually mild in western Canada. One of his British colleagues chided him in print for suggesting that climatic conditions over such widely separated regions of the globe could be linked. In his reply Walker predicted, correctly, that an explanation would be forthcoming, but that it would require a knowledge of wind patterns above ground level, which were not routinely being observed at that time.

G. The need for long-term time series. It seems obvious that without good baseline data ornithologists are doomed to be surprised by the arrival of *El Nino* every few years. Even when ornithologists and ecologists are at hand to take advantage of an incoming *El Nino*, lack of preexisting data, and of monitoring afterwards, makes it difficult to understand responses of birds to the successive *El Nino*, *La Nina*, and “normal” years. Indeed, according to Jaksic, during the last century there were 12 *El Nino* years and 12 *La Nina* years, thus leaving about 76 ‘normal’ years in between. Thus, by heavily concentrating attention on only 12% of the time span *El Nino*, and of neglecting possibly another 12%, ornithologists are essentially ignoring what happens during 76% of the time. This situation may be remedied only as long as data are logged on a regular or continuous basis, that is, as long-term time series. The recipe prescribed by Schreiber & Schreiber to understand *El Nino*, effects on birds still stands: ‘...carry out long-term studies that will shed further light on the interactions between global atmospheric cycles, oceanographic phenomena, and avian populations.’

H. Populations of seabirds in Alaska are larger and more diverse than any similar region in the Northern Hemisphere. The extensive coastal estuaries and offshore waters of Alaska provide breeding, feeding and migrating habitats for 66 species of seabirds. At least 38 species of seabirds, over 50 million individuals, breed in Alaska. Eight Alaskan species breed only here and in adjacent Siberia. Five additional species range through the North Pacific, but their populations are concentrated in Alaska. In addition to breeding grounds, Alaskan waters also provide important wintering habitat for birds that breed in Canada and Eurasia. Shearwaters, which breed in the southern hemisphere, are the most numerous species in Alaskan waters during the summer.

I. As another indication that food has been limiting in recent years, several largescale die-offs of seabirds, mostly surface-feeding species, have been observed in the Gulf of Alaska during the last decade, most notably in 1983, 1989 and 1993. But Hatch thinks that it is too early to decide the

these die-offs reports are somehow connected with effect of *El Nino*. Byrd and Tobish believe that high rainfall can affect survival of chicks in earthen burrows, and incidence of big storms with high winds during the chick-rearing period can cause mortality for chicks of species nesting on cliff- ledges, but this view has not been considered as convincing evidence.

Questions 41-48

Choose the correct letter A, B, C, or D. Write your answers in boxes 41-48 on your answer sheet.

41. Why do scientists want to investigate *El Nino* phenomenon at the beginning of the passage?

- A. To learn patterns of creatures that live in marine environment.
- B. To assist us to map out because it disturbs normal cycle of wildlife and human.
- C. It has profound theory for both the academic side and practical side.
- D. Tropical Pacific Ocean is where *El Nino* affects most.

42. Why do scientists use seabirds as important subjects when observing climate change world- widely?

- A. Seabirds affected by prey changes according to the temperature and ice.
- B. Its size is large enough to be observed.
- C. *El Nino* affects seabirds more than other sea creatures.
- D. North America is situated in the area where *El Nino* affects most.

43. What happened for marine mammals that live in Tugidak Island in Gulf of Alaska?

- A. The number of seals declined about 85% from the mid of 20th century.
- B. The number of Steller sea lions declined while the number of seals grew.
- C. Birth rate and breeding females declined on the Tugidak Island.
- D. The situation of mammals on the island is not that worse than we expected.

44. According to J. Walker, what happens in the monsoon seasons notably?

- A. Flood and drought seriously damage almost everywhere of the planet.
- B. Walker's prediction would soon come true.
- C. Drought only affects some parts of Africa.
- D. Drought will affect somewhere of the earth such as Australia and Indonesia.

45. In paragraph F, what is closest in meaning to "chided"?

- A. blamed B. praised C. rebuked D. voted

46. In paragraph G, what is closest in meaning to "avian"?

- A. of or connected with amphibians B. of or connected with birds
- C. of or connected with fish D. of or connected with mammals

47. Which of the following statements is **NOT TRUE** about the passage?

- A. Seabirds are regarded as precious indicators of changes in oceanic environment.
- B. Seabirds such as Fulmars and Murres feed by the characteristic of prey in different ways.
- C. It is difficult for ornithologists and ecologists to investigate *El Nino* because of the lack of available statistics and inspections.
- D. Steller sea lions only decline in birth rate and fewer pups, but the whole population wouldn't be affected by the changes.

48. Which of the following statements is **TRUE** about the passage?

- A. With reply of Walker's colleague, knowledge of wind patterns will be very helpful.
- B. Habit of seabirds in Alaska is similar to those in the Northern Hemisphere.
- C. Byrd and Tobish think that heavy rainfall and storms cause mortality for chicks, which has already been a convincing proof.
- D. Hatch thinks that it is too early to determine all the problems that are caused by *El Nino*.

Your answers:

Question 45:	Question 46:	Question 47:	Question 48:

Do the following statements agree with the information given in the passage? In boxes 49-50 on your answer sheet, write

YES if the statement agrees with the claims of the writer
NO if the statement contradicts the claims of the writer
NOT GIVEN if it is impossible to say what the writer thinks about this

Question 49. Number of Shearwaters in the southern hemisphere feed most
during the summer.

Question 50. The largescale die-offs of seabirds were observed in the Gulf of
Alaska in the twenty-first century.

Your answers:

Question 49:	Question 50:
------------------------------	------------------------------

PASSAGE 2. Read the following passage and do the tasks that follow.

UNIVERSITY SIX MONTHS ON

A. It only seems like yesterday that I left home but it's already been six months. How time flies! Since I came here, I have not only learned a lot about Britain's culture, but also made a lot of friends from all over the world. Even more importantly, my experience here has inspired me a lot and positively changed some of my perspectives. My studies have been going really well and I love my new course. Fitting in has been a major issue because my culture, food and background are completely different from everyone else. Still, I love these differences because it means that I have so much to learn.

B. I really enjoy the intellectual atmosphere here as I can freely express my own views. I have always been taught to accept all information taught in textbooks, and the teacher was always right, there was no room for arguments or disagreements. I just had to accept and memorise facts. However, at the university, lecturers have a role in the development of my own thoughts and ideas. In fact, arguing and debating with tutors is encouraged, to promote independent thinking. My professor always encourages us to challenge his views or traditional thinking in class – students in Britain are encouraged to think critically.

C. As a former journalist, I am amazed at the degree of independence and freedom that the media enjoys here in Britain. It is very easy to read or hear different points of view from the media. In such a relaxed atmosphere, I volunteered to be a student representative at the Students' Union, participating actively in student union meetings and raising various issues concerning student rights. We successfully changed our school's decision to cancel one of our modules. I also sent an e-mail to the Head of the Business School, suggesting a better way of running our course, and the Head has promised to reply. Now, I have learned not only to be more confident to talk about my views but also to be more open to consider different opinions.

D. Now I would also like to tell you about my busy social life outside my studies. I am now teaching children in the city, although I am not being paid for this work. With my help, not only are their language and writing skills improving but also their bonds to Japanese culture are strengthened. Also, I often help the elderly people of Bristol. I helped them arrange a party and invited a group of local primary school children to join.

The passage has five paragraphs A-D. Choose the correct heading for each paragraph from the list of headings below. Write the correct number i-viii in boxes 51-54 on your answer sheet.

51. Paragraph A _____
 52. Paragraph B _____
 53. Paragraph C _____
 54. Paragraph D _____

List of Headings

- i* style of education
ii voluntary work
iii finding accommodation
iv getting involved at university
v leisure time
vi nightlife
vii adapting to a different culture
viii taking part in sports

Your answers:

Question 51:	Question 52:	Question 53:	Question 54:
------------------------------	------------------------------	------------------------------	------------------------------

PASSAGE 3:

QUESTIONS 55-60: *Read the passage and fill in ONE suitable word for each blank (1.5 pts).*

The idea that teaching methods should match a student's particular learning style - their personal way of learning - is popular with teachers and students ____ (55) ____ . But the evidence suggests it may not be helpful.

The concept of learning styles is one of the most influential - and widely criticized - theories in education. It is the idea that each ____ (56) ____ finds it easier to learn through a particular method of instruction. Some people, for example, are thought to learn better when they're taught visually; others, when instruction is auditory, or through movement, and so on.

The idea is popular in part because it reflects the intuition of teachers and students. Everyone knows from personal experience that some kinds of learning feel easier than others, and that they may prefer one way of learning ____ (57) ____ another. And it is also popular because it claims to be based on science. The idea of learning styles was developed in the 1970s, ____ (58) ____ psychologists and educational theorists were trying to understand how people learn. The idea that different people learn information in different ways was appealing, and it soon became clear that many people had strong preferences about how ____ (59) ____ liked information to be presented. In a typical research study, one group of students might be classified as 'visual learners', while another group would be classified as 'auditory learners'. All the students would then be asked to learn something, with half the visual learners being taught ____ (60) ____, and half being taught aurally.
